PROJECTS

CRM (Customer Relationship Management) System

- Developed a comprehensive CRM system using Laravel to manage customer interactions and streamline business processes.
- Email Template Management: Created customizable email templates for automated communication.
- Dashboard Reports: Designed interactive dashboard reports for real-time data visualization.
- Report Filters: Implemented advanced filtering options for generating customized reports.
- OTP Authentication: Integrated OTP-based authentication for secure user access.
- User Activity Tracking: Tracked and logged user activities for audit and analysis.
- Notifications: Implemented real-time notifications for updates and alerts.
- Data Handling: Managed large datasets efficiently with optimized database queries.
- Invoice Management: Developed an invoice generation and tracking system.
- Search Functionality: Added advanced search features for quick data retrieval.

HRMS (Human Resource Management System)

- Developed an HRMS system using Laravel to automate and manage HR processes.
- Asset Management: Tracked and managed company assets assigned to employees.
- Employee Management: Maintained employee records, including personal details, job roles, and performance data.
- Holiday Management: Created a system to manage and track company holidays.
- Leave Management: Automated leave requests, approvals, and tracking.
- Notifications: Implemented real-time notifications for leave approvals, holiday updates, and other HR-related alerts.
- User Activity Tracking: Monitored and logged user activities for security and audit purposes.

Ticket Management System

- Developed a ticket management system during the internship to track and resolve customer and internal issues efficiently.
- Implemented features such as ticket creation, assignment, priority setting, and status tracking.
- Designed a user-friendly interface for both admin and end-users to ensure seamless issue resolution.
- Integrated email notifications and OTP-based authentication for secure access.

Customizable email template project in Laravel

- Developed a web application using the Laravel framework to manage and send customizable email templates.
- Created an email template management system enabling admins to efficiently send, track, edit, and add templates.

Personal Portfolio

- Developed a personal portfolio website showcasing my skills, projects, and accomplishments.
